

Spectrum Products introduces the new Mobile Anchor Transport Evolution. The MATE is the common anchor evolving into new applications including basketball hoops, guard chairs, assisted access lifts, starting platforms, and stanchion posts.

The MATE allows for the flexibility of products to be moved around the pool deck, into storage or from pool to pool allowing your facility to enjoy the versatility of the MATE.

The MATE is safe and easy to operate. It has three high performance locking wheels and two pull-out locking legs for added safety and stability.
