

Stationary Backstroke Start Wedge, Part Number 1710083

The Stationary Backstroke Start Wedge shall provide swimmers with an adjustable foot wedge to be used to aide in backstroke starts. The stationary backstroke start wedge shall will be mounted to the underside of the platform top surface using the frame attachment loop and existing hardware provided with the starting platform frame. Swiveling snap hooks shall connect to the frame attachment loop for simple removal/application of the start wedge. The position of the start wedge shall be adjustable via sliders located on the adjustment straps.

Hardware

The Stationary Backstroke Start Wedge hardware shall be fabricated from 304L stainless steel material. Hardware shall include adjustment sliders, swiveling snap hooks, frame attachment loops, and any additional hardware provided by Spectrum.

Wedge

The wedge shall be constructed of an injection molded glass reinforced polypropylene copolymer. The wedge shall have the following dimensions: 8cm height 2cm width at the bottom edge 10° sloping face and 0.5cm radius along the upper edge. The wedge shall have a molded non slip surface for contact with the swimmers feet. The wedge shall be red in color.

Straps

Adjustment Straps for the Stationary Backstroke Start Wedge shall be a Thermoplastic Polyurethane coated Polyethylene Terephthalate strap of 1 inch width.

Warranty

Warranty limited to Spectrum Standard terms and conditions. See Spectrum warranty information at www.spectrumproducts.com
