

Climbing wall pricing is based on two factors: model and configuration (panel height x panel width). The climbing walls can be expanded overtime as programming and budget grow.

Maximizing the height of the climbing wall to your water depth is typically recommended before expanding the width, as it's more economical to expand the wall across rather than up. Here we illustrate the most common configurations. Ask us for details about custom configurations.

One Panel Wide

A one panel wide wall is an ideal starter wall to promote climbing and offer a unique climbing feature to the facility. A single wide wall safely accommodates 1 climbers and can be installed in pool depths with as low as 5' of water.

Panels	Climbing Height	Poolside Length	Min. Water Depth	Drop Zone
5 Panel High	16' 5" Tall	15' 3"	9' 0"	12' 0"
4 Panel High	13' 1" Tall	13' 3"	7' 0"	10' 0"
3 Panel High	9' 10" Tall	13' 3"	6' 0"	9' 0"

Two Panel Wide

A two panel wide wall is ideal for a facility looking to offer more climbing terrain laterally for one climber at a time.

Panels	Climbing Height	Poolside Length	Min. Water Depth	Drop Zone
5 Panel High	16' 5" Tall	18' 6"	9' 0"	12' 0"
4 Panel High	13' 1" Tall	16' 6"	7' 0"	10' 0"
3 Panel High	9' 10" Tall	16' 6"	6' 0"	9' 0"

AquaClimb Climbing Walls

As the sport of rock climbing explodes in popularity, our pool climbing walls capitalize on the excitement by giving your members and visitors a safe yet exciting way to participate. Climbing spans all ages and skill levels, expanding your reach in all demographics. Our climbing walls add a unique experience that brings more families, teens and adults to your pool.

Classic

Our entry level line offers budget-friendly clear flat polycarbonate panels. Customizable in height and width to accommodate pool design and programming needs.

Starting around \$8,000

Classic Plus

Using the same Classic frame, upgrade to our 3D contour panels to enhance the climbing experience, allowing lifeguard visibility behind the wall while also giving privacy to the climber.

Starting around \$11,000

Kurve

Our premium option with a unique wave-like frame, the Kurve brings a deep water solo experience with 3D contour panels at heights exceeding the Classic Plus line.

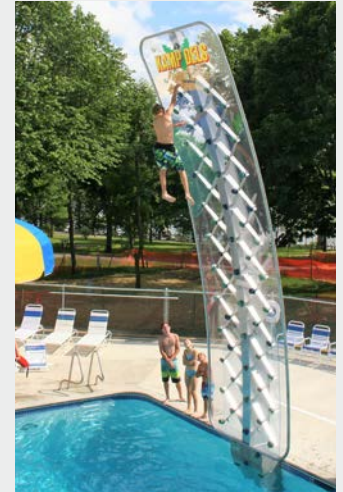

Starting around \$20,000

Sport

Our elite Sport wall caters to the most daring participants with a challenging climb up to 27 feet. The innovative design includes a single panel with a sleek industrial frame.

Starting around \$80,000

AquaZip'N

A cross between the traditional rope swing and a zipline, the AquaZip'N is a thrilling adventure for your pool. The AquaZip'N's design allows for clean entry into the water and eliminates swing back through its arching frame. The AquaZip'N has a proprietary self-retracting trolley making it easy to operate and allowing for high throughput.

Starting around \$14,000

AquaNinja

Warrior play, just add water! AquaClimb's latest poolside adventure, designed to bring excitement and challenge to the pool for teens and adults. Utilizing a stainless steel core, the monkey bars are suspended across 20' of water offering a unique twist on climbing over water.

Starting around \$25,000
