

Portable Motion Trek[™] BP 300 & Deluxe

The Motion Trek 300 and 300 Deluxe are battery powered lifts that are portable and designed to fit more pool and gutter configurations than any other portable lift on the market. These lifts are designed for both in-ground pools and spas. The small footprint of these lifts allows them to stay out of the clear deck space zone for aquatic lifts that is required by the ADA guidelines; making them fully ADA compliant.

Part #165600
Part #165600-DLX
